

Ka-Comm., Inc. Universal Gun Mount

FLEXIBILITY

This weapon mount system can be installed in almost any location. Behind the driver or passenger seat, to prisoner partition with or without space saver option, on canine transport cages or overhead. Virtually in almost any horizontal or vertical application.

MULTIPLE LOCK OPTIONS

These mounts can be ordered with standard locks that are weapon specific or the universal handcuff lock.

*All locks available with override key. Available in handcuff, barrel (vending machine), or straight key.

Model: KAC-DGM-STATIC

The Ka-Comm gun mount can be ordered in a single gun mount configuration. In the single configuration, the weapon can either be mounted off-set to either side or center mounted to the post. This flexibility allows the end user to position the weapon in a location that is in an ergonomically and space conscious manner.

Our gun mount is the only universal gun mount on the market that can be installed in any vehicle with almost any type of weapon configuration. We also offer an optional security upgrade that includes security nuts and bolts.

This mount can be configured for either a single weapon or dual weapon at any time. Allowing individuals to start with a single weapon and add an additional or different weapon with minor changes in the layout of the system.

Model: KAC-SGM-STATIC

Available with flex mounting brackets

Model: KAC-DGM-FLEX

The Ka-Comm gun mount can be ordered in a Flex mount configuration. This option allows for mounting the rack directly behind either the driver or passenger seat. With this option your personnel will have the full mobility of the seat.

By adding the No-Holes drilled configuration for your standard police fleet units, these gun mounts actually require no drilling for installation.
